 - Reviewed Interim consolidated financial statements for 2025;
 - Explanation of separated and consolidated business results.
7. The full content of the report was posted on our website: **www.vtctelecom.com.vn**
8. Explanation of interim business results in 2025:

Reasons for fluctuations in the interim business results of 2025 compared to the same period in 2024:

In the first 6 months of 2025, the parent company's revenue decreased compared to the same period in 2024, primarily due to most projects being in the implementation phase and not yet generating revenue. Consequently, revenue remained low, while expenses continued to be incurred, resulting in a negative business performance for the first half of 2025. Interim revenue in 2025 reached VND 85,292 million, an increase of 20% compared to the same period in 2024; net loss after tax was VND 9,187 million (compared to a net loss of VND 12,664 million in the first half of 2024).

The subsidiary – Smart Technology Investment and Development Joint Stock Company – has not yet generated significant revenue from new products and services. Therefore, interim revenue in 2025 increased compared to the same period in 2024 but still remained low. Interim revenue in 2025 reached VND 27,104 million, an increase of 130% compared to the same period in 2024; net loss after tax was VND 3,626 million (compared to a net loss of VND 1,939 million in the first half of 2024).

Regarding the consolidated interim business results of 2025, consolidated revenue reached VND 112,096 million, an increase of 36% compared to the same period in 2024; net loss after tax was VND 11,073 million (compared to a net loss of VND 13,673 million

in the first half of 2024). The Company is currently accelerating the progress of its projects to be able to record revenue and profit in the last six months of the year.
